

ISO 20022 – MT to MX Conversion Table

The purpose of this document is to provide additional details regarding the Swift MX payment message types that U.S. Bank will support.

Important Address Deadlines

	<p>In the future, all parties will require addresses to be provided with a wire payment. At a minimum, town and country, or address line 1 will be required.</p> <p>This requirement will apply to all wires, regardless of initiation channel.</p> <p>Until address is required, it is a best practice to start incorporating this information whenever possible.</p> <p>Note: If you are sending a wire on behalf of a consumer in SinglePoint®, address is required in the Originator Information (ORG) field as well.</p> <p>Beginning in November 2026, unstructured addresses will be eliminated from Domestic and International wires.</p>
